

Insulation protection & installation

1/4

Temati B.V. offers a wide range of solutions to protect your insulation systems against mechanical damage, weather influences, chemical attack and the ingress of moisture through vapour permeance (cold and ambient systems).

Temati is sole European licensee manufacturer/supplier for **Foster®** products supplies a full range of mastics, coatings, sealants and adhesives for the attachment, sealing and coating of thermal insulation materials. As a forerunner in the development of more environmentally-friendly products, **Foster®** offers a full range of effective water-based products for all insulation systems, including water-based vapour-barriers.

In addition to the **Foster®** range, various other solutions are available. Temati offers a complete range of products for the protection and installation of your insulation systems, such as **Tembitil IF™** aluminium butyl-rubber vapour barrier foil/tape and several other tapes, foils, rubber-sheeting, **Fibaroll®** G.R.P. (Glassfibre Reinforced Plastic), metal jacketing with or without moisture barrier plus hangers, washers, banding, clips, screws and other accessory materials.

<p>Foster® Mastics/Coatings/Sealants/Adhesives A complete range of insulation support materials, mastics, coatings, adhesives and sealants for cold and warm insulation systems. To be used for attachment, sealing and vapour barrier and/or weather-resistant protection.</p>	
<p>Fibaroll® GRP – Glassfibre Reinforced Plastic. A mechanically strong, UV light curing, vapour barrier for cold insulation systems.</p>	
<p>Tembutil IF Multi-purpose butyl rubber protective tape/foil. Excellent puncture and tear-resistant vapour barrier with M1 fire rating.</p>	
<p>Vaporstop™ Foil/Tape Multi-layer construction of aluminium and PET-foil, primarily used in cold cryogenic insulation systems.</p>	
<p>Scrimtex™ / Mast-A-Fab® Scrimtex: 10x10 fibreglass scrim fabric. Mast-A-Fab: Polyester fibre with PVA finish.</p>	
<p>Knitmesh Knitmesh metal fabrics for high temperature insulation pad construction.</p>	
<p>BD 6 cement Composition from cementitious binders to protect insulation.</p>	
<p>Kestopur PL2400 A solvent-free, two-component polyurethane adhesive which forms a very strong but still elastic adhesive joint, also suited for cryogenic applications.</p>

Ancillary Products

Ancillary materials for application in thermal insulation systems.

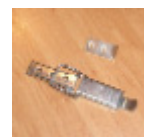

Stainless Steel Band and Clips

Stainless Steel band and L-clips for fastening insulation jacketing. Available in 305/316. Other alloys on request.

Toggle clips

Supplied in several dimensions.

Screws, bolts, nuts and rivets

Available in various dimensions and types.

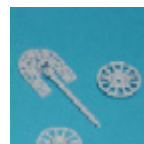

Filament tape

In length, with glass-fibres, reinforced tape, which is used to strengthen insulation pipe-sections and to keep scales in place; available in several widths.

Clipfas

Nylon hangers and washers, 75mm, 500 sets per box. Hangers can be fixed on top of each other.

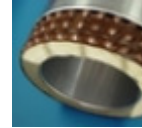

Insulation protection & installation

4/4

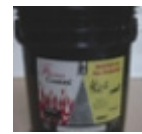

Temafol™

Temafol™ HDPE polyolefin with studded profile.

Flame Control Mastic

Water base fire retardant coating.

Tembulan™

Butyl/EPDM rubber sheeting.
