

Ancillary Products

Ancillary materials for application in thermal insulation systems

- **Stainless steel jacketing**
- **Aluminium jacketing (with moisture barrier)**
- **Banding, seals, wire**
- **Fixing materials**

Ancillary products

Temati offers a selection of ancillary materials to complete its range of insulating materials and finishing products. Products are supplied in accordance with specific customer requirements, e.g. with regard to fire-rating, choice of materials (stainless steel, aluminium, etc.), hardness, moisture barrier, corrugated etc.

Jacketing

- Stainless steel 304/316 (average weight $\pm 8,18 \text{ kg/m}^2 / \text{mm}$) other alloys available delivered in coils or sheets.
- Aluminium (average weight $\pm 2,76 \text{ kg/m}^2/\text{mm}$) delivered in coils or sheets available with moisturebarrier (polykraft, polysurlyn®) and in smooth, corrugated, stucco embossed finish. All according to client's specifications.

Fixing Materials (SS316)

- Stainless steel wire, banding and seals
- Self-drilling and self-tapping screws, rivets
- Toggle fasteners, wire mesh
- Hangers, washers, anchors
- Welding pins and studs
- Breather springs

Joint and Finishing tapes

- Aluminium (reinforced) and multi-layer aluminium tapes
- Filament tapes
- Butyl rubber and modified bitumen adhesive tapes

Sealing Products

- Silicone, M.S. Polymer, PU in cartridges
- Butyl rubber beads/strips
- Butyl rubber/EPDM sheeting
