

TEMTEX™ Q-14/PTFE

Description	High temperature glass fabric with a protective, water repellent and chemical-resistive Teflon™ treatment; good cutting characteristic and resistance to abrasion.			
Applications	- Insulation mattresses - Compensators - Chemical environments			
Approvals				
Characteristics of Temtex Q-14/PTFE				Test method
Total weight	g / m ²	550	± 5%	
Width (std)	mm	1475	± 10	
Thickness	mm	0.325	± 0.10%	
Roll length (std)	m	50		
Application temperature	°C	-150 till +260		
Remarks				

Fabric structure				
	Unit	Data	Tolerance	Test method
Base fabric		Fiberglass Satin weave		
Weight	g / m ²	420	± 5%	
Weave		-		
Setting	per cm	-	± 3%	
Warp	Tex	-	± 5%	
Weft	Tex	-	± 5%	
Tensile strength (warp x weft)	kg / cm	730x460		
Coating / Finish		PTFE		
Weight	g / m ²	-		
2 sided		Grey on front side, lightly black on back-side.		

Tensile strength data refers to loomstate fabrics. Stability, thickness and surface weight vary according to the type of fabric finish. The given values are approximate and not guaranteed.
